## COURSEWORK

### UNDERGRADUATE

Data Structures and Algorithms

Operating Systems

Artificial Intelligence

DBMS

Object Oriented Programming

IoT Architecture and Protocols

Computer Networks

## SKILLS

### PROGRAMMING

C\C++ • Python • HTML\CSS

ReactJS • MySQL • JavaScript

Bootstrap • RestAPIs • jQuery

Familiar:

NodeJS • ExpressJS • MongoDB

### OTHER TOOLS

Vs Code • Git • Adobe Photoshop

Adobe Premiere Pro • Postman • Canva

### HACKATHONS

Dec 2023 Amazon HackOn

Apr 2023 Flipr Hackathon

Jan 2023 Semicolon 8.0

## EXPERIENCE

### TIGER ANALYTICS | MLE APPLICATION ENGINEER INTERN

Jan 2024 - July 2024

- As a MLE App Engineer Intern at Tiger Analytics, I have gained basic skills on Python, SQL, Linux, Excel, Git, and MLE. Currently working on a project as a Full Stack Developer (MERN).

## PROJECTS

### PROVISION APP | MANAGEMENT APP

May 2024 - Ongoing

- Provision App is a revolutionary platform transforming project feedback and management where users can seamlessly submit feedback for their projects, while admins can create projects, assign teams, and craft dynamic feedback schedules.
- Powered by React.js, Node.js, and Prisma, Provision App offers a seamless and intuitive experience. .

### INFOPEDIA | SOCIAL MEDIA APP

Aug 2023 - Dec 2023

- The Social Media Application is a platform that facilitates real-time chat conversations with friends and the sharing of images, promoting social connectivity and expression within a digital community.
- Utilized ReactJS, NodeJS, Expressjs, and MongoDB for an engaging and responsive social media experience.

### SHOPNEST | E COMMERCE APP

Aug 2023 - Dec 2023

- An e-commerce website offering a wide product range for online shoppers, with user-friendly features like reviews, secure payments, and order tracking.
- Developed using ReactJS for the captivating front-end, NodeJS, Expressjs, MongoDB, and RESTful APIs for seamless, real-time functionality.

### BOOK SHARE | DONATION APP

May 2023 - Sep 2023

- BookShare is a web application designed to enable users to buy, sell, and donate books to NGOs, fostering a vibrant community of book enthusiasts.
- The application was built using a technology stack that includes ReactJS for the front-end, NodeJS and Expressjs for the back-end, MongoDB as the database. .
