PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with 2+ years of experience architecting scalable microservices, and optimizing backend systems. Delivered measurable gains: 60% reduction in database query latency and 40% improvement in API response times across enterprise platforms.

TECHNICAL SKILLS

Languages	C/C++, Python, JavaScript, TypeScript, HTML/CSS
Frameworks	ReactJS, NextJS, NodeJS, ExpressJS, FastAPI, Redux, REST APIs
Databases & Cloud	MySQL, MongoDB, PostgreSQL, Databricks, Redis
Tools	Git, Docker, CI/CD, SonarQube, n8n, Github Copilot, Claude
Coding Profiles	Leetcode , TakeUForward

EXPERIENCE

Senior Engineer

Jan 2026 – Present

Tiger Analytics

Chennai, TN

- Spearheaded enterprise GenAI chat platform using Next.js, FastAPI, Node.js, PostgreSQL, and Databricks Unity Catalog for 50+ daily active users.
- Reduced database query latency by **60%** via Databricks Unity Catalog APIs and Redis caching layer, cutting response times from ~500ms to ~200ms.
- Orchestrated SSO and RBAC for tenant management across 3+ enterprise apps using Okta and Microsoft Entra, reducing auth support tickets by **30%**.
- Improved model response times by **20%** by architecting real-time ML streaming pipelines with React Redux for progressive rendering.

Application Engineer

Jan 2024 – Dec 2025

Tiger Analytics

Chennai, TN

- Decreased API latency by **40%** for 20+ concurrent users via fault-tolerant FastAPI/React microservices with optimized NoSQL schemas and Redis caching.
- Standardized OAuth 2.0 and JWT across 5+ React POC apps, reducing auth implementation time by **50%** per project.
- Eliminated **15+ critical vulnerabilities** pre-production by enforcing SonarQube quality gates across 10+ POC projects.
- Boosted internal productivity by **25%** for 30+ users by embedding SharePoint document previews via Microsoft Graph API.

PROJECTS

Jarvis AI Assistant

Apr 2026 – Present

- Architected a context-aware desktop AI assistant (Python + HTML/CSS) with real-time system commands, web search, and voice-driven automation, reducing manual task execution by **60%**.
- Automated **60%** of manual orchestration by integrating n8n workflows with TTS/STT and a multi-format document parser (PDF, DOCX, TXT) for hands-free multi-step workflows.

EDUCATION

B.Tech in CSE with IoT, SRM Institute of Science and Technology

2020 – 2024

CGPA: 9.16 / 10.00 | Coursework: Data Structures & Algorithms, OS, DBMS, OOP
